### RE: GRADE 8 LONG DAY SCIENCE EXCURSION

Dear Parents,

On Tuesday, 19 September all Grade 8 students will be travelling to the Waddamana Power Station Museum.

The purpose of the excursion is for the students to see first hand how energy transformations take place in the real world and to gain an understanding of how renewable energy is produced and managed.

The excursion will leave Huntingfield Campus at 9:00am, and return to the Huntingfield Campus at approximately 4:00 pm. There will also be the opportunity for students to be dropped off by St David's Park in Davey Street.

Students will need to bring enough food for the whole day excursion. There will not be any opportunity to purchase food or drinks.

Should you have any queries, please email Mr Martin McManus by no later than Monday, 11 September at [martin.mcmanus@catholic.tas.edu.au](mailto:martin.mcmanus@catholic.tas.edu.au)

Kind regards,

Mr Martin McManus  
Gr 7/8 LC Co-ordinator

Mr Joseph Sandric & Mr Brendan Gill  
Co-Principals
